KING PAC INDUSTRIAL CO., LTD

High quality products are the customer's highest satisfaction

GROUP OF BUSINESS

1. Packaging Industry
 - King Pac Industrial Co., Ltd.
 - King Bag Co., Ltd.
 - Domestic Business
2. Real Estate
3. Industrial Estate

As the largest plastic bag manufacturer in the Asian continent, King Pac Industrial Co., Ltd. is a full-fledged plastic bag supplier located nearby Laem Chabang Port in Thailand. On 107,920 square meters (11,617,641.21 square feet) of factory land where King Pac Co., Ltd. is 73,200 SQM and King Bag Co., Ltd. is 34,720 SQM, our state-of-the-art facility is capable of producing largest 100,000 metric tonne largest of finished products per year. Every step in the production process is undertaken by nearly 2,000 experienced operators and is under close supervision of experienced quality control staff. Our meticulous selection of raw materials purchased from both local and overseas suppliers augment our products to achieve the highest quality.

KING PAC HISTORY

BACK IN 1976

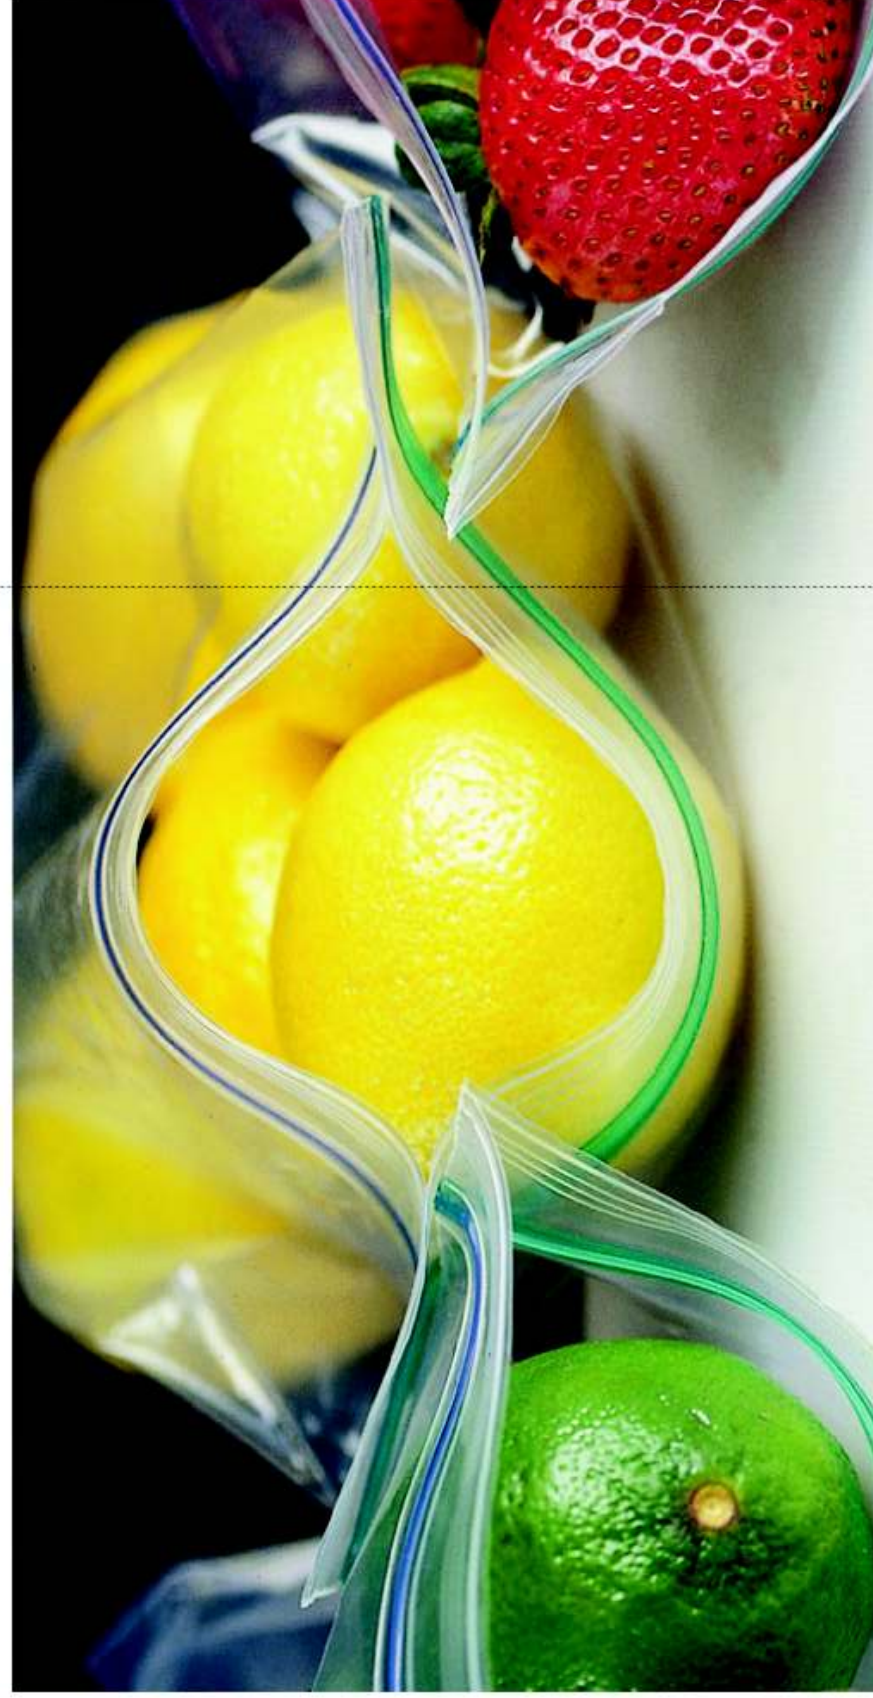

KING PAC INDUSTRIAL CO., LTD is one of the leading plastic bag manufacturers in Asia. The company was established in 1976 to manufacture plastic bags. Over time, the company has become well known worldwide for its sustained growth and high quality products. The products are produced from Polyethylene (PE) including HDPE, LDPE, and LLDPE via use of an extrusion, blow film and curing process adjusted in accordance to the customer's requirements. The company uses high quality standard machines with advanced production technology from around the world that are operated and controlled by staff who have over 30 years of experience. These combined attributes allows for us to reach a production capacity of 100,000 Metric Tons per annum.

Specifications (maximum and minimum)

T SHIRT BAGS

T Shirt Bags Heat Seal

T Shirt Bags Heat Seal

T Shirt Bags Heat Seal have a durable bottom seal created by a high heat sealing technique. The bags are strong and can hold a heavier weight. They are often seen used in supermarkets and local shops.

PRODUCT CODE INDEX		Printed		Thickness (microns)		Width (cm)		Length (cm)	
Code no.	Description	Min	Max	Min	Max	Min	Max	Min	Max
7200	T-shirt BAG HEAT SEAL	1	4	8	30	15	70	30	70

T Shirt Bags Flat Seal

T Shirt Bags Flat Seal

T Shirt Bags Flat Seal are convenient for storage of lightweight items which need to be carried from place to place. The bottom of the bags has a good aesthetic appearance, which is created by using a low heat sealing technique.

TSE	T-SHIRT BAG EMBOSSED	5	4	8	50	15	70	30	70

T SHIRT BAGS

Oxo-Degradable T Shirt Bags

Oxo-Degradable T Shirt Bags

Oxo-degradable T Shirt Bags are manufactured with an additive which accelerates the destruction of the plastic film. Bags are marked with a date of manufacture, and from that date, the plastic will begin to degrade in approximately 12-18 months. And completely degrade in 24-36 months depending on the amount of degradable additive added. These bags degrade into plastic dust and thus do not release CO₂ into the atmosphere.

PRODUCT CODE INDEX		Period		Thickness (microns)		Width (cm)		Length (cm)	
Code no.	Description	Min	Max	Min	Max	Min	Max	Min	Max
1800	OXO DEGRADABLE T-SHIRT BAG	1	4	8	90	15	70	30	70

Biodegradable T Shirt Bags

Biodegradable T Shirt Bags

Biodegradable T Shirt Bags are made from a natural material, usually Starch based, and are intended to degrade in composting facilities where they disappear in a short timescale, leaving no waste, methane or harmful residues.

PRODUCT CODE INDEX		Period		Thickness (microns)		Width (cm)		Length (cm)	
Code no.	Description	Min	Max	Min	Max	Min	Max	Min	Max
1800	BIODEGRADABLE T-SHIRT BAG	1	4	8	90	15	70	30	70

T SHIRT BAGS

T Shirt Bags on Roll

T Shirt Bags on Roll

The T-shirt Bags on Roll come in a roll making them easy to dispense and store. The bags are widely used in supermarkets to contain all types of items such as vegetables, fruit, meat products, stationery, confectionery and more.

TSC8	T-SHIRT BAG WITH ADDITIONAL CLOSING TIE	1	4	8	50	15	70	30	70

GARBAGE BAGS

Without the proper management of waste, it can lead to an unhealthy and unappealing lifestyle. Garbage Bags assist in proper waste management within communities as small as a simple household to communities as large as a municipality or city. Garbage bags come in many shapes, strengths, sizes and color. We are able to customize your Garbage bags with your own unique printing, design, shape, size, closure, color and thickness to suit the demands of each market globally and to assist in the proper waste management of communities.

Specifications (maximum and minimum)

Garbage Bags

Garbage Bags Heat Seal

Garbage Bags Heat Seal

Garbage bags with heat seal are commonly used in public areas and households. The bags are made from resins that are highly resistant to puncturing and tearing. The bottom of the bag is sealed with a high heat sealing technique leading to the durable base. The bags can be used to store wet, dry, heavy, hard, soft, organic or non organic waste generated from households, businesses, or communities.

PRODUCT CODE INDEX		Printed		Thickness (micron)		Width (cm)		Length (cm)	
Code no.	Description	Min	Max	Min	Max	Min	Max	Min	Max
5863	GARBAGE BAG HEAT SEAL	1	2	13	50	20	120	10	200

Garbage Bags Flat Seal

Garbage Bags Flat Seal

Garbage bags with flat seal are commonly used in households and offices. The bag has a good aesthetic appearance as the sealing at the bottom of the bag is created with low heat technique. These bags are commonly used as liners and to contain light weight litter.

PRODUCT CODE INDEX		Printed		Thickness (micron)		Width (cm)		Length (cm)	
Code no.	Description	Min	Max	Min	Max	Min	Max	Min	Max
5864	GARBAGE BAG FLAT SEAL	1	2	30	60	10	120	10	200

Garbage Bags

Star Seal Garbage Bags

Star Seal Garbage Bags

The Star Seal Garbage Bags have a strong and neat seal. Unlike a regular sealed Garbage bag where the weight of the contents is supported by a single sealed line, the star seal disperses the weight across a star shaped cross seal which allows the bag to carry more weight. The bags come in a roll, which is easy to dispense and store.

PRODUCT CODE INDEX		Printed		Thickness (microns)		Width (cm)		Length (cm)	
Code no.	Description	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.
9809	STAR SEAL GARBAGE BAGS	1	1	8	40	40	60	20	100

T Shirt Garbage Bags

T Shirt Garbage Bags

The T Shirt Garbage Bags make it easier to contain and dispose of garbage. When the bag is full, tie the two handles together to secure the garbage and lift the handles to remove from bin and dispose. The bags can be made white and thus are aesthetically pleasing making them suitable for household use in the bedroom, kitchen and bathroom. These bags are also commonly used in hotels and public facilities.

PRODUCT CODE INDEX		Printed		Thickness (microns)		Width (cm)		Length (cm)	
Code no.	Description	Min.	Max.	Min.	Max.	Min.	Max.	Min.	Max.
9804	T SHIRT GARBAGE BAG	1	2	10	30	3	30	60	100

Garbage Bags

Extra Thick Garbage Bags

Extra Thick Garbage Bags

Extra Thick Garbage Bags have the strength and durability to hold heavier and sharper objects. The tensile strength is enhanced with the extra thickness making the bags harder to tear and puncture. These bags are suitable for heavy industrial use, home and garden use, and public area use.

PRODUCT CODE INDEX		Printed		Thickness (micron)		Width (cm)		Length (cm)	
Code no.	Destription	Min	Max	Min	Max	Min	Max	Min	Max
GB05	EXTRA THICK GARBAGE BAG	1	1	30	45	51	102	40	100

Garbage Bags On Roll

Garbage Bags On Roll

Garbage Bags on Roll are durable, high quality, and odorless bags suitable for general garbage disposal. The bags come in a roll making them easy to dispense and use less space to store. Garbage Bags on roll are most commonly used in the EU and USA markets

PRODUCT CODE INDEX		Printed		Thickness (micron)		Width (cm)		Length (cm)

GB06	GARBAGE BAG ON ROLL - HDPE	1	1	8	50	10	100	20	150

Garbage Bags

Garbage Bags Flat Pack

Garbage Bags Flat Pack

Garbage Bags Flat Pack are commonly used in the Japanese and Australian markets. They come in a neat PE or PP outer flat packaging. The package usually has a large area for printing a bigger logo and promotional contents making them attractive on shelf and when stored at home.

PRODUCT CODE INDEX		Printed		Thickness (micron)		Width (cm)		Length (cm)	
Code no.	Destription	Min	Max	Min	Max	Min	Max	Min	Max
GB07	GARBAGE BAG FLAT PACK	1	2	12	40	50	90	50	120

Clear Garbage Bags

Clear Garbage Bags

Clear Garbage Bags are suitable for use in public areas as the contents of the garbage bag are visible externally. The bags are strong and durable fit for use indoors and out. The Bag has a good aesthetic appearance thus also making it perfect for use in bedrooms and bathrooms. A common place for use of such bags is in Hotels, Hospitals and Airports.

PRODUCT CODE INDEX		Printed		Thickness (micron)		Width (cm)		Length (cm)

GB08	CLEAR GARBAGE BAG	1	2	12	40	50	90	50	120

Garbage Bags

Draw Tape Garbage bags

Draw Tape Garbage bags

Draw Tape Garbage Bags have the easiest closure mechanism for garbage bag. They are highly durable bags suitable for garbage containment and storage of general items. Secure closure of the bag is made easy with the use of a drawtape mechanism. Once the bag is full, draw the tape to close the bag and dispose.

Oxo-Degradable Garbage Bags

Oxo-Degradable Garbage Bags

Oxo-degradable Garbage Bags are manufactured with an additive which accelerates the destruction of the plastic film. Bags are marked with a date of manufacture, and from that date, the plastic will begin to degrade in approximately 12-18 months and completely degrade in 24-36 months depending on the amount of degradable additive added. These bags degrade into plastic dust and thus do not release CO2 into the atmosphere.

ZIP LOCK BAGS

A fairly new and innovative bag, the Zip Lock is commonly used in all industries such as manufacturing, catering, food, financial, hospitality, government institutes and also in the household. With the film's impermeable properties and secure closing mechanism, the bags are used to store all kinds of items. The LDPE film is strong and yet flexible enough to serve the need to reuse the bag several times. The bags have many applications for storing food and even freezing food. They are used for storing general items such as stationery, money, peripherals, dry food and more. We are able to customize your Zip lock bags with your own unique printing, design, shape, closure profile, color, thickness and size.

Specification (maximum and minimum)

ZIP LOCK BAGS

Saddle (Deli) Zip Lock Bags

Saddle (Deli) Zip Lock Bags

Saddle Zip Bags are an easy and convenient way to store and dispense the zipper bags. The bags are made in pairs joined together at the top by a perforated saddle. Several of these pairs of bags are then stacked and sealed together with a hot melted punch. The hot melted punch then serves as a hole to place the bags on a dispensing unit of fixed wicket installed in a deli or grocery shop. When there is a need for a bag, the bag is simply torn off the perforated saddle and used as desired.

FOOD BAGS

Every food retail outlet can not do without such bags. Whether it is behind the fish, meat, bakery, vegetable or dairy counter, store staff use food bags to store all food items. Even though the primary purpose of going to a store for a shopper is to buy food, they tend to avoid coming into direct contact with the food for hygiene and health reasons. Due to the impermeability and cleanliness of plastic film, it serves as the best form of packaging for food with no other alternative. Food bags come in many shapes and forms and we are able to produce a great variety with customized sizes, printing, and color.

Punch Out Bags

Punch Out Bags

Punch out bags are thick shopping bags with a die-cut handle usually shaped as an oval or kidney. This bag does not have an extra patch of film around the die cut handle like the patch handle bag, so the items being carried in this bag are usually lighter. Never the less, there is also the option of folding the top of the bag and sealing it to make a double layer before punching the handles. Similar to the patch handle and soft-loop bags, this bag is often the bag of choice for the high-end retailers or branded products.

Semi-Punch Out Bags

Semi-Punch Out Bags

Semi- Punch out bags are thick shopping bags with a die-cut handle usually oval or kidney shaped. The difference between the Semi-Punched and Full-Punched handle is that for the Full-Punched handles, a distinctive hole is left after the punch. For the Semi-Punched, there is a flap remaining to cover the hole after the punching process. When the bags are used, this flap folds upwards, serving as a reinforcement for the holes making them stronger handles. Similar to the patch handle and soft-loop bags, this bag is often the bag of choice for the high-end retailers or branded products.

Flip Handle Bags

Flip Handle Bags

The Flip Handle Bags are designed in such a way that it minimizes the movement of the bag when it is carried. They usually have a large bottom gusset and thus are suitable for holding cake. During storage of the bags in the pack, the handles are neatly folded inside the bag. To carry the bag, these handles are flipped out of the bag and this action automatically puts the bag into shape ready for the transport of fragile items such as cake. On top of this, the handles are flipped out in such a way that it serves as a larger surface area for carrying. This increases the strength of the bag and makes it the most comfortable bag to carry.

BLOCK HEADER BAGS

Most supermarkets have to serve thousands of customers everyday. This makes it vital for them to be able to provide quick and efficient service in order to maintain customer satisfaction. Packing the food into bags behind the deli and checkout counters are often very time consuming. One of the quickest ways to do this is to use Block Header Bags. A Stack of bags attached together with a block of plastic at the top of the stack is called a Block Header Bag. The block of plastic usually has holes for hanging the bags behind the counter. The bags are connected to the block with perforation making it easy to dispense from the block.

SANITARY/DOGGY/NAPPY BAGS

Nappy Bags

Nappy Bags

The Nappy Bags are designed as a convenient and hygienic way of disposing baby's Nappies. Each bag is a perfect size to hold nappies. They are easy to use and can be easily dispensed individually from either soft packs or dispenser boxes. Wherever you take your baby, you should have a pack of nappy bags to help make it easy and hygienic to dispose of nappies.

PLASTIC SHEETS

Polyethylene sheets have the characteristic of being flexible yet impermeable to most elements. Thus, plastic sheeting is used for many applications. Plastic sheeting is used to line roads, protect pedestrians from construction debris, line tables, cover seats of a new car, and much more.

Specification (max and min)

PLASTIC SHEETS

Table Cloth

Table Cloth

Plastic table cloths are used to protect the table from being stained or scratched. There is an option of thick and durable table cloths that are designed to be used many times and easy to wipe clean, and there is also the option of thinner sheets which can be disposed of after being used once. Such products are suitable for restaurants which set the tables many times over. Table cloths can be printed with unique multicolor patterns and can come as on roll or folded flat packs.

Some of the unique plastic bags/sheets that King Pac Industrial have produced, include Liquid carrier bags, Ice Bags, Piping bags, Aprons, Plastic Gloves, Umbrella Bags and many more.

Specification (max and min)

OTHER BAGS

Liquid Carrier Bags

Liquid Carrier Bags

Liquid Carrier Bags are used in warm countries where carbonated drinks are stored in bottles at room temperature. This is true especially at the local grocery shops where they want to save on electricity. The un-refrigerated carbonated drink is poured into the Liquid Carrier bags along with ice, making the drink refreshingly cold. The bags are strong and durable therefore leakage is not a problem. With a straw and with handles on the bag, the customer can walk out of the store into the hot climate with a cold refreshing drink.

0001	LIQUID CARRIER BAG	1	1	5.5	110	10	80	20	100

Ice Bags

Ice Bags

The Ice bags are designed as clear bags with a higher tolerance for subzero temperatures. The bags are strong, puncture resistance, and do not break at low temperatures. A lot of supermarkets sell packs of ice and the packs are usually made from Poly Ethylene film. These packs of ice are usually stored in the frozen food or ice-cream section of the shops.

OTHER BAGS

Piping Bags

Piping Bags

The Piping bags are widely used to pipe semi-solid food such as creams and pastes by pressing them through a narrow opening at one end. These bags are often used in bakeries for cake decoration and can come in a variety of sizes.

Plastic Gloves

Plastic Gloves

The plastic gloves are designed to be economical and disposable. Commonly used in the catering industry, these gloves protect the food from coming into direct contact with the preparers hands. Most high class restaurants and hotels make it compulsory for their chefs to wear these gloves when preparing and serving food. These thin plastic gloves are also useful to protect hands from paint, ink, glue, other messy liquids.

OTHER BAGS

Plastic Apron

Plastic Apron

Plastic Aprons are thin disposable sheets of film that are perfect for protecting your attire during messy jobs. You can use these aprons in the kitchen, lab, workshop, art studio, or anywhere you feel your clothes need protection. They can be produced with thicker gauges and be used several times before disposal or they can be made thin and cheap and disposed of after one time usage. Either on roll or in a flat pack, they are easily stored in your home drawers and cabinets.

Umbrella Bags

Umbrella Bags

Umbrella bags are commonly used in the rainy season. After being in rain, a lot of water remains on the umbrella even after you shake a lot off. Such bags help prevent water from dripping all over a shopping mall's, office's or hotel's floors. When you enter such buildings, you often see an umbrella bag dispensing unit at the entrance. Just tear off one of the bags and slip your folded wet umbrella inside. The dripping water is held in the umbrella bag and ensures safe, dry, and clean floors.
